The Pasta experience

Geminal BIO pasta is produced in an organic Italian pasta factory, with a very low environmental impact. The plant, developed on an area of 14,000 square meters, is completely built with the organic architecture, an eco-friendly branch of modern architecture.

The wheat being 100% Italian, the slow drying process and the bronze drawing are the strengths for obtaining excellent pasta: Organic and High Quality. Just open a pack of pasta to “feel” the scent of the raw material, an indication of superior quality.

The continuous search for quality and the attention to sustainability remain the cardinal principles that accompany the evolution of Geminal BIO. Now also pasta enters the assortment: a healthy and quality food, a project with a sustainable model, from the farm to fork.
